

AURORACIRCUITS
North American Technology Solutions Provider for Printed Circuits

Automotive

Aurora Circuits has proven to be a strong, reliable, long-lasting partner to manufactures in the Automotive industry. Our ability to manufacture PCBs that can withstand exstreme temperature, dirt, chemicals, and mositure has been proven time and time again by our outstanding customer statisfaction rating in the automotice industry.

Automotive Applications include, but are not limited to;

- Digital Displays
- Engine control
- Transmission control modules
- LED Lighting
- Sensor systems
- Comfort systems
- GPS & Navigation
- Emergency assistance systems
- Touch Screens and LCD Displays
- Occupant detectors
- So much more!

When choosing an Automotive PCB Manufacturer, you have to be sure they are going to meet the specific capabilities of the contract manufacturer. At Aurora Circuits, we refine and define standards to uphold these contracts without fault. This includes;

A Well-defined Manufacturing Process – our team of engineers works to streamline processes to ensure effective manufacturing of your PCBs. This helps to cut down lead times, reduce cost, and results in consistent quality products that adhere to the toughest of Automotive Industry standards.

A Modern Facility – The latest technology needs to come from the latest and greatest machines. Aurora Circuits has updated our facility and factory floor continuously over the last 10 years. Adding new testing equipment, automated machines to reduce human error, and ensuring all staff is adequately training is our main priority.

Engineering Capabilities – It's important to know who you're getting into business with. Companies who do successful work, want to showcase it. That's why we list case studies on our website, and encourage current customers to leave us an honest review. We have built consistent, long-lasting relationships with some of the major automotive engineering companies, international manufacturing conglomerates, and LED manufacturers.

About Aurora Circuits

Over 70 years' experience in Printed Circuit Fabrication providing Advanced Thermal Management and Interconnect Technology Solutions for Printed Circuit Designs and Specialty Products.

As one of the trailblazers and longest established, domestic manufacturers in the printed circuit board industry, (formerly known as Kalmus & Associates), Aurora Circuits is known as an industry leader in innovation, customer service and engineering. Let us partner with you to maximize profitability and production sustainability.
